PERSONAL STATEMENT

Software Engineer with 4+ years of experience developing enterprise applications across banking, financial services, and pension management domains. Experienced in building scalable web applications using React.js, Java Spring Boot, Node.js, and Oracle Database. Strong background in REST API development, system integration, deployment, and production support for mission-critical systems.

TECHNICAL SKILLS

Programming : Java, JavaScript , TypeScript , C#
Frontend : React.js , Redux Toolkit , HTML , CSS , Tailwind CSS
Backend : Spring Boot , Node.js , Express, Sequelize, ASP.NET Framework
Database : Oracle , SQL Server , MySQL
DevOps : Docker , Jenkins , OpenShift , Oracle WebLogic , Linux , Nginx
Integration : REST API , Kafka , Redis , SFTP
Tools : Git , Postman , Power BI

EXPERIENCES

Software Engineer | PT Bank Mandiri Tbk | Jakarta, Indonesia Feb 2023 – Present (Contract)

- Delivered 4 enterprise banking applications supporting fraud monitoring, risk scoring, wholesale banking, and transaction processing from development through production deployment. (React.js, TypeScript, Java Spring Boot, Oracle Database)
- Developed scalable frontend applications with reusable components and integrated RESTful APIs for fraud analysis and risk management systems. (React.js, Redux Toolkit, Tailwind CSS, Axios)
- Built backend services, business logic, and REST APIs to support enterprise banking workflows and system integrations. (Java Spring Boot, Node.js, Oracle, Stored Procedures)
- Designed and developed interactive dashboards and data visualization components for enterprise risk scoring applications using React.js.
- Implemented secure data integration and transaction processing using SFTP, Kafka, and Redis to support Fraud Risk Management System (FRMS). (Spring Boot, Kafka, Redis, SFTP)
- Managed application deployment and release activities across Oracle WebLogic, Jenkins, Nginx, and OpenShift environments while providing production support for business-critical systems.
- Served as PIC for multiple application initiatives, collaborating with Business Analysts, QA Engineers, and Infrastructure teams throughout the SDLC.

Full Stack Developer Praisindo Teknologi | 2022 – 2023

- Developed and enhanced enterprise pension management (DPLK AXA) applications by implementing new business features and improving existing modules. (C#, ASP.NET Framework)
- Designed and optimized SQL Server Stored Procedures to improve data processing and application performance. (SQL Server, T-SQL)
- Developed ETL packages for data migration and integration between enterprise systems. (SSIS)
- Built operational and financial reports to support pension fund management and business monitoring. (SSRS, SQL Server)
- Collaborated with business users to analyze requirements, implement solutions, and resolve production issues throughout the application lifecycle.

IT Programmer

PT WhiteOpen Teknologi | 2021 – 2022

- Developed and maintained web-based business applications based on client requirements. (C#, ASP.NET Framework, JavaScript, jQuery, HTML, CSS)
- Implemented application enhancements and resolved software defects to improve system reliability.
- Performed requirement gathering and system analysis through direct communication with clients and end users.
- Developed business reports and dashboards for operational analysis. (Power BI, Microsoft Excel)
- Supported application deployment, maintenance, and post-production troubleshooting

EDUCATIONS

Bachelor of Information Systems | University of Gunadarma | 2014–2016

Diploma of Management Information | University of Gunadarma | 2011–2014

Final Project

Android-Based Basketball Training Application

(Java, Android SDK, Eclipse Kepler, SQLite)

KEY PROJECTS

Analyst Management System

Fraud case management platform.

Tech Stack: React.js, Redux Toolkit, Bootstrap CSS, Axios, Node.js / Express, Sequelize, Oracle Database

Performance Planning & Management System (PPMS)

Enterprise performance management platform.

Tech Stack: Java Spring Boot, Oracle Database, Stored Procedures

Early Warning System (Wholesale Banking)

Transaction monitoring and fraud detection platform..

Tech Stack: React.js, Redux Toolkit, Tailwind CSS, Axios, Java Spring Boot, Oracle Database

Kopra Risk Scoring

Rule-based transaction risk scoring platform with interactive dashboard and data visualization for risk analysis.

Tech Stack: React.js, Redux Toolkit, Tailwind CSS, Axios, Chart.js/Recharts, Java Spring Boot, Oracle Database

Incoming Transaction System

Backend transaction processing service supporting customer credit data processing and secure integration with Fraud Risk Management System (FRMS).

Tech Stack: Kafka, Java Spring Boot, Oracle Database, SFTP

DPLK Fee Management System (AXA)

Enterprise pension fund fee management and reporting system.

Tech Stack: ASP.NET Framework, SQL Server, SSIS, SSRS

Enterprise Integration (Toyota Motor Manufacturing Indonesia)

Enterprise application integration supporting secure data exchange with Toyota Motor Manufacturing Indonesia (TMMIN).

Tech Stack: ASP.NET Framework, JavaScript, jQuery, SQL Server
